READ THE STORY AND ANSWER THE QUESTIONS THAT FOLLOW (LEARN THE STORY)

THE GLASS BOX

Tenali Raman had been absent from the court for a week .as he was ill. King missed his wit and intelligence greatly. When Tenali came back he looked quiet and dull. The king gave him a challenge in order to make him feel better.

King called his craftsman and asked them to make a glass box which was sealed on all sides. Next morning when all the courtiers assembled in the court, he announced that anyone who could put anything inside the glass box without opening it would be rewarded suitably.

All the courtiers tried but failed. At last Tenali Raman came forward and asked for a tall lamp to be placed in front of the box at a particular position. Then he stood between the lamp and the box. His shadow appeared inside the box. Tenali Raman got excited and asked the king to see his shadow inside the box. The king laughed and clapped in appreciation of Tenali's wonderful imagination.

Main Idea

Directions: Read the story, then answer the questions.

A tree is more than the enormous plant you see growing in your yard. A large part of the tree grows under the ground. This part is called the roots. If the tree is very big and very old, the roots may stretch down 100 feet!

The roots hold the tree into the ground. Without them, it would fall over! The roots do another important job for the tree. They gather minerals and water from the soil to feed the tree so it will grow. Most land plants, including trees, could not live without roots to support and feed them.

1. The main idea is:

The roots of the tree are underground.

The roots do important jobs for the tree.

2. Where are the roots of a tree?

3. The roots help to hold the tree up. Yes No

4. Name two things the roots collect from the soil for the tree.
